EXPLANATORY NOTES

This Act restructures certain government departments, bodies and funds.

The Ministère des Services gouvernementaux is abolished and its responsibilities transferred to the Chair of the Conseil du trésor.

Certain funds are abolished or merged with other funds. Accordingly, the Act

(1) establishes the Natural Resources Fund to take over the activities of the forestry fund, the sustainable forest development fund and the mining heritage fund, and receives the revenues collected by the Agence de l'efficacité énergétique, which is abolished by this Act and whose activities are transferred to the Ministère des Ressources naturelles et de la Faune;

(2) creates the position of chief scientist, whose incumbent acts as chair of the board of directors of each of the three funds created under the Act respecting the Ministère du Développement économique, de l'Innovation et de l'Exportation to support research and, more particularly, coordinates efforts on issues that are common to the three funds and advises the Minister on the development of research and science; the Act also provides for the appointment of a scientific director to each fund;

(3) establishes the Territorial Information Fund to take over the activities of the land information fund and the geographic information fund;

(4) establishes the Natural Disaster Assistance Fund to take over the activities of the ice storm fund and the financial assistance fund in respect of certain disaster-affected areas;

(5) abolishes the farm-loan insurance and forestry-loan insurance funds, and transfers their activities to La Financière agricole du Québec;

(6) abolishes the government air service fund and transfers its activities to the Centre de services partagés du Québec; and

(7) abolishes the Fonds de l'industrie des courses de chevaux.

The following advisory councils are integrated into the government departments they come under: the Conseil consultatif du travail et de la main-d'œuvre, the Conseil de la science et de la technologie, the Conseil des relations interculturelles, the Conseil de la famille et de l'enfance, the Conseil des aînés and the Conseil permanent de la jeunesse.

The activities of some bodies are integrated into another body or a government department. Thus, the activities of the Conseil des services essentiels are integrated into those of the Commission des relations du travail; those of the Corporation d'hébergement du Québec, into those of the Société immobilière du Québec, except those of its financial division, which are transferred to the Ministère des Finances; and those of Immobilière SHQ, into those of the Société d'habitation du Québec.

The Act abolishes the Société québécoise d'assainissement des eaux and creates the Commission sur l'éthique en science et en technologie to advise the Minister of Economic Development, Innovation and Export Trade on the ethical issues arising from science and technology.

For the purposes of such restructuring, a number of transitional measures are provided with regard to the transfer of the rights and obligations of abolished bodies and funds, the continuation of their activities, the transfer of their assets and personnel, and the terms of their members.

“20.1. The Société’s objects in respect of health and social service providers, and for a consideration, are

(1) to offer those providers and the Minister of Health and Social Services technical, contractual and financial expertise relating to the management, construction, maintenance and acquisition of health and social sector installations, equipment and infrastructures;

(2) to own movable and immovable property used or to be used by health and social service providers;

(3) to provide financial support to health and social service providers for the carrying out of projects, activities or particular operations falling within the scope of their mission;

(4) to develop property management expertise in the health and social sector in partnership with the private sector;

(5) at the request of the Minister of Health and Social Services, to transfer the ownership of any vacant immovable or other unused asset owned by the Société under subparagraph 2, subject to the conditions agreed between that Minister and the Société; and

(6) to carry out any other mandate the Minister of Health and Social Services entrusts to it.

For those purposes, it may, among other things, exercise its powers under paragraphs 1 to 3 of section 18, except the power to maintain an immovable occupied by a public or private institution under agreement within the meaning of either of the Acts mentioned in the fourth paragraph.

Section 260, paragraph 3 of section 263 and sections 263.1 and 264 of the Act respecting health services and social services (chapter S-4.2) apply, with the necessary modifications, to the property management operations the Société carries out under this section.

For the purposes of this Act, health and social services institutions, agencies and regional councils governed by the Act respecting health services and social services or the Act respecting health services and social services for Cree Native persons (chapter S-5) and any other person, partnership or association designated for that purpose by the Minister of Health and Social Services or the Government are health and social service providers.

“20.2. The Société shall act as the manager of any project requiring authorization from the Minister of Health and Social Services and the Conseil du trésor and described in subparagraph 2 of the first paragraph of section 260

of the Act respecting health services and social services (chapter S-4.2) or subparagraph 1 of the first paragraph of section 72 of the Act respecting health services and social services for Cree Native persons (chapter S-5), whether the project concerns a public institution or a private institution under agreement, as well as any project of a health and social services agency requiring approval from that Minister.

The Minister of Health and Social Services may, however, if circumstances warrant it, authorize another manager for such a project.

If the Société acts, under this section, as manager of a project concerning a public institution or a health and social services agency and the project is a public infrastructure project within the meaning of the Act respecting Infrastructure Québec (chapter I-8.2), the first four paragraphs of section 9 of that Act apply to the Société, which remains responsible for the project and retains control over it.

However, an agreement for the performance of all or the major part of asset maintenance work on a facility maintained by a provider must first be authorized by the Minister of Health and Social Services. “Asset maintenance” has the meaning assigned to it by the second paragraph of section 263.1 of the Act respecting health services and social services (chapter S-4.2).

“20.4. The Société and the Minister of Health and Social Services shall enter into a management agreement applicable to the property management operations the Société carries out under sections 20.1 and 20.2.

“20.5. The rent of an immovable belonging to the Société the lessee of which is a health and social service provider is based on the actual costs the Société assumes for the immovable. As of the total repayment of the debt service, the rent of an immovable corresponds to the amount required to repay the actual costs assumed from then on by the Société in respect of the immovable.

The composition of the actual costs referred to in the first paragraph is determined in the management agreement entered into under section 20.4.

“20.6. In carrying out the objects described in sections 20.1 and 20.2, the Société shall act in accordance with the orientations determined by the Minister of Health and Social Services under section 431 of the Act respecting health services and social services (chapter S-4.2) and the management agreement required under section 20.4.”

The Société may, in the same manner, enter into an agreement and take part in joint projects with a Québec government department or body or with any person or body.

“22.2. If a public institution referred to in an Act mentioned in the fourth paragraph of section 20.1 must provide for the financing of major expenditures resulting from the carrying out of an investment project related to the institution’s installations or infrastructures, the Government may, on the recommendation of the Minister of Health and Social Services, if it considers that the circumstances so warrant and on the terms and conditions it determines, authorize the institution, despite any provision to the contrary,

(1) to transfer any property it owns to the Société to enable the Société to carry out any planned investment project, and to receive, as consideration, the sum necessary for the payment of any debt relating to the transferred property;

(2) to lease any property transferred to the Société in return for a rent that ensures the repayment of the principal of and interest on any sum transferred to the institution by the Société or paid by the Société for the carrying out of an investment project;

(3) to resume, if necessary, ownership of the property upon expiry of a lease entered into under subparagraph 2.

The Act respecting duties on transfers of immovables (chapter D-15.1) does not apply to a transfer or resumption of ownership of property referred to in this section.”

(1) by replacing “100 000 000” in the first paragraph by “300 000 000”;

SCHEDULE II
(Section 128)

AN ACT RESPECTING ENERGY EFFICIENCY AND INNOVATION

CHAPTER I

ACTIONS TO FOSTER ENERGY EFFICIENCY AND INNOVATION

DIVISION I

FUNCTIONS AND POWERS OF THE MINISTER

1. The Minister of Natural Resources and Wildlife is responsible for fostering and promoting energy efficiency and innovation.

The Minister is to draw up a comprehensive energy efficiency and innovation plan and ensure that it is implemented and followed up.

The Minister defines the content of fuel efficiency programs and measures, multi-energy-source programs and measures, and energy innovation programs and measures.

2. The Minister may

(1) develop and implement energy efficiency and innovation programs and measures;

(2) provide technical support for research and development in the field of energy efficiency and innovation;

(3) implement energy efficiency and innovation measures to reduce greenhouse gases;

(4) delegate to another party the implementation of energy efficiency and innovation programs and measures, including measures to reduce greenhouse gas emissions;

(5) for the purposes of the comprehensive energy efficiency and innovation plan, follow up and assess the work done in the context of energy efficiency and innovation programs and measures, including measures to reduce greenhouse gases.

For the purposes of this section, the Minister may join forces with a partner active in the field of energy efficiency or energy innovation.

3. The Minister may require any person who is subject to this Act to provide, within the time specified, any information or document the Minister needs for the exercise of functions under this Act.

DIVISION II

COMPREHENSIVE ENERGY EFFICIENCY AND INNOVATION PLAN

4. For the purposes of this Act,

“diesel fuel” means a liquid mixture of hydrocarbons obtained from the refining of petroleum and intended to supply diesel engines;

“electric power distributor” means Hydro-Québec when carrying on electric power distribution activities;

“energy distributor” means a distributor of electric power, natural gas or fuel, a municipal electric power system governed by the Act respecting municipal and private electric power systems (R.S.Q., chapter S-41) or the Coopérative régionale d’électricité de Saint-Jean-Baptiste de Rouville governed by the Act respecting the Coopérative régionale d’électricité de Saint-Jean-Baptiste de Rouville (1986, chapter 21);

“fuel” means gasoline, diesel fuel, heating oil or propane, but not aviation fuel, marine bunker fuel, hydrocarbons used as raw material by industries that transform hydrocarbon molecules through chemical or petrochemical processes or renewable fuel content;

“fuel distributor” means

(1) a person who refines, manufactures, mixes, prepares or distils fuel in Québec;

(2) a person who brings or causes to be brought into Québec fuel contained in one or more receptacles with a total capacity of over 200 litres, except fuel contained in a fuel tank installed as standard equipment to supply the engine of a vehicle;

(3) a person who, in Québec, exchanges fuel with a person described in paragraph 1; or

(4) a legal person or partnership that brings fuel into Québec for a purpose other than resale;

“gasoline” means a liquid mixture of hydrocarbons obtained from the refining of petroleum mainly for use as spark ignition engine fuel;

“heating oil” means a liquid mixture of hydrocarbons obtained from the refining of petroleum and used for domestic, commercial, institutional or industrial heating;

“natural gas distributor” means a natural gas distributor as defined in section 2 of the Act respecting the Régie de l’énergie (R.S.Q., chapter R-6.01);

“propane” means a liquid mixture of hydrocarbons obtained from the refining of petroleum or the processing of natural gas and used either as spark ignition engine fuel or for such purposes as cooking and domestic, commercial, institutional and industrial heating.

5. Based on the Government’s energy strategies and policies, the Minister draws up, at least once every five years, a comprehensive plan outlining the measures proposed to promote more efficient energy use and innovation in the energy sector.

The plan must address all energy uses and cover all forms of energy over a five-year period.

6. The comprehensive plan must include

(1) a status report with regard to energy efficiency and innovation in Québec;

(2) policy directions, priorities and targets with regard to energy efficiency and innovation;

(3) a summary of energy efficiency and energy innovation programs;

(4) the list of energy efficiency projects submitted by the electric power distributor under the fourth paragraph of section 8; and

(5) a summary of measures conducive to energy efficiency or innovation.

7. For the purpose of drawing up the comprehensive plan, the Minister

(1) prepares, based on the information and comments provided by energy distributors and government departments and based on the Minister’s own observations and assessments, a status report which allows energy efficiency and innovation needs and potential to be determined;

(2) prepares a consultation document, which includes the status report as well as the policy directions and priorities the Minister intends to pursue with regard to energy efficiency and innovation;

(3) consults the persons and bodies to whom those policy directions and priorities are to be applicable;

(4) establishes policy directions and priorities with regard to energy efficiency and innovation and communicates them to energy distributors and government departments so that they may follow them in preparing any programs or measures under the comprehensive plan; and

(5) develops fuel efficiency programs and measures, multi-source-energy programs and measures, and energy innovation programs and measures.

8. For the purposes of the comprehensive plan, the electric power distributor and natural gas distributors must establish energy efficiency programs or any other measures to promote more efficient energy use and innovation in the energy sector, in accordance with the policy directions and priorities established by the Minister.

A program or measure must include a description of the actions to be carried out, the cost of those actions and a time frame for their achievement.

By the date set by the Minister, each distributor must send to the Minister a description of its programs and measures for each form of energy and sector of activity.

The electric power distributor must also send to the Minister a list of the energy efficiency projects it has chosen in the course of the year by means of the tender solicitation procedure established under section 74.1 of the Act respecting the Régie de l'énergie.

9. On failure of the electric power distributor or a natural gas distributor to comply with section 8, the Minister defines the content of the distributor's programs and measures at the distributor's expense, after giving 30 days' written notice to that effect.

10. The Minister examines the programs and measures of the electric power distributor and natural gas distributors. The Minister also examines the programs and measures proposed by other energy distributors or by government departments, with a view to integrating them into the comprehensive plan.

All energy efficiency and innovation programs and measures financed by the annual contributions paid under section 17 are part of the comprehensive plan, as are the programs and measures chosen by the Minister from among those proposed.

The Minister sets energy efficiency and innovation targets, based on the information provided by energy distributors and government departments and on the programs and measures that are part of the comprehensive plan.

11. The comprehensive plan is submitted to the Government for approval; once approved, it is made available to the public.

12. With the Government's approval, the Minister may revise the comprehensive plan to reflect changes in the energy situation or in the programs and measures contained in the plan.

13. An energy distributor must carry out the programs and measures for which it is responsible under the comprehensive plan.

If an energy distributor is unable to carry out a program or measure within the time and in the manner specified in the comprehensive plan, it must notify

the Minister. The Minister may, at the distributor's expense, implement the programs and measures the distributor has failed to carry out, after giving 30 days' written notice to that effect.

14. In order to follow up the programs and measures that must be carried out by an energy distributor, the Minister may require that the distributor submit a status report on the actions undertaken under the comprehensive plan and on the results obtained.

15. The Minister may charge fees for services the Minister provides with regard to energy efficiency, greenhouse gas reduction or energy innovation programs or measures.

16. For the period and subject to the conditions it determines, the Government sets the overall financial investment for actions designed to foster energy efficiency and innovation. The Government allocates this investment among the different forms of energy in order to determine the contribution payable by energy distributors under section 17.

17. Energy distributors must pay their annual contribution to the Minister in accordance with the due dates, rate and calculation method determined in a government regulation. The regulation may set the interest rate on amounts due and the penalties for non-payment.

The rate, calculation method and other terms referred to in the first paragraph may vary from one distributor or category of distributors to another. The regulation may also exempt a distributor or category of distributors.

A penalty set by the Government under the first paragraph may not exceed 15% of the amount that should have been paid.

The first paragraph applies to Hydro-Québec despite section 16 of the Hydro-Québec Act (R.S.Q., chapter H-5).

18. Every distributor must file a statement with the Minister on the date set and in the form prescribed by the Minister, specifying, for the period covered by its preceding fiscal year,

(1) the volume of natural gas or electric power it distributed;

(2) the volume of fuel it brought into Québec for a purpose other than resale;

(3) the volume of fuel intended for consumption in Québec it sold and refined in Québec or brought into Québec and, where applicable, the volume it exchanged with a person described in paragraph 1 of the definition of "fuel distributor" in section 4; and

(4) any other information the Minister deems necessary for the purposes of this chapter, in the form prescribed by the Minister.

For the purposes of subparagraph 3 of the first paragraph, fuel sold in Québec is deemed to be intended for consumption in Québec.

19. The Minister determines the amount that each energy distributor must pay under the regulation referred to in section 17 and notifies the distributor of it.

The Minister may make an agreement with the Régie de l'énergie to entrust that body with such tasks as

(1) the examination of the annual volume statements filed by energy distributors; and

(2) the calculation of the annual contribution payable by each energy distributor.

The Minister collects the annual contributions and pays them, along with any interest and penalties, into the Natural Resources Fund established under section 17.12.12 of the Act respecting the Ministère des Ressources naturelles et de la Faune (R.S.Q., chapter M-25.2). These sums are used for the purposes referred to in subparagraph 3 of the first paragraph of that section.

DIVISION III

ENERGY EFFICIENCY AND ENERGY CONSERVATION STANDARDS FOR CERTAIN APPLIANCES

20. In this Act, the term “appliance” means any new household, commercial, industrial or institutional electrical or hydrocarbon-fuelled appliance.

21. The Government may, by regulation, set energy efficiency and energy conservation standards for the appliances or categories of appliances it determines.

These standards may include manufacturing and assembly standards.

22. The Government may regulate the labelling of appliances, particularly as to the form, content, size, colour, manner of affixing and position of the labels and special stamps appliances must bear, and the materials of which such labels and stamps must be made.

It may also determine the information that must appear on appliance packaging.

23. A regulation may make mandatory the energy efficiency, energy conservation or labelling standards set by a certifying or standards body. It may also prescribe energy efficiency testing procedures for appliances and require that appliances be approved or certified by such a body.

The regulation may provide that references to other texts include any subsequent amendments to those texts.

24. The Minister may, by way of exception, permit a manufacturer to apply energy efficiency or energy conservation standards different from those set by regulation, for a period of not more than five years and on the conditions determined by the Minister, to appliances or categories of appliances incorporating innovative technology, if it is demonstrated that the resulting energy consumption is equal to or lower than that permitted by regulation.

25. No person may manufacture, offer, sell or lease an appliance or otherwise dispose of it by gratuitous or onerous title by way of a commercial transaction if the appliance does not conform to the applicable energy efficiency and energy conservation standards.

This section does not apply to appliances marketed exclusively for use outside Québec.

26. The Government may, by regulation, require a manufacturer, vendor, renter or lessor of appliances to keep a register in prescribed form containing information pertaining to the carrying out of this Act.

CHAPTER II

INSPECTION

27. The Minister may, in writing, designate personnel members of the department to act as inspectors.

28. An inspector may, for the purposes of this Act,

(1) enter at any reasonable hour the establishment or the property of an energy distributor or any place where an appliance is manufactured, warehoused or offered for sale or lease;

(2) examine any appliance, subject it to testing to see if it complies to this Act, take it to another place, if necessary, and return it as soon as possible once testing has been completed;

(3) examine and make copies of books, records, accounts, files and other documents;

(4) require that information be given and documents be produced; and

(5) require to be accompanied by the person or persons of the inspector's choice.

Any person who has the care, possession or control of books, registers, accounts, records or other documents must make them available to the inspector on request and facilitate their examination. The owner or person in charge of the premises referred to in subparagraph 1 of the first paragraph, or any person present on the premises, is required to assist the inspector in carrying out the inspection.

The inspector and any person accompanying the inspector must, if so requested, produce identification and proof of appointment.

29. Neither an inspector nor a person accompanying an inspector may be prosecuted by reason of an official act performed in good faith in the exercise of their functions.

30. No person may hinder the work of an inspector or a person accompanying an inspector in the exercise of their functions.

31. No person may refuse to provide information or documents required under this Act, or make, concur in or authorize a false or misleading statement in the course of an inspection.

32. If an inspector notes the absence of a prescribed label or the non-conformity of an appliance with energy efficiency or energy conservation standards, the inspector may affix a special stamp prescribed by regulation to the appliance, indicating that it cannot be marketed. The appliance cannot be marketed until the inspector acknowledges that it conforms to the prescribed standards and removes the stamp.

The remainder is payable in three equal quarterly payments.

63. The Régie de l'énergie sends to the Ministère des Ressources naturelles et de la Faune a copy of the annual statements of volumes filed by energy distributors under section 85.31 of the Act respecting the Régie de l'énergie for the 2010-2011 fiscal year.
